A happy student in the field of Information Engineering meet and work with new people to expand knowledge and develop skills. Despite having educational background in Informatics Engineering, I am communicative, enjoy learning new things, and like new challenges. Apart from that, I have an interest in the Programmer Field, Web Development, Graphic Design, Video Editor, Full Stack Development, and Front End Development. I have a strong desire to pursue a career in the field of Programming, Web Development, Mining, and Software Engineer.
